822 Heat and Air Expands Commercial HVAC Service Across Greater DFW Metroplex

August 27, 2026

Benbrook, TX - August 27, 2026 -
822 Heat and Air, a heating and air conditioning contractor based in the Greater DFW Metroplex, has expanded its commercial HVAC installation and air conditioning repair services to meet growing demand across the region. The expansion broadens the reach of the company's certified technicians into additional communities throughout North Texas, including Crowley, Fort Worth, Arlington, and surrounding suburbs.

The expanded offering focuses on complete HVAC installation for both large-scale commercial and residential customers. Services now available include central air systems, rooftop units, split systems, ventilation solutions, ductwork design, heat pump systems, chiller systems, and building automation systems. The company also provides commercial HVAC replacement, repair, and ongoing maintenance for businesses across the metroplex.

Businesses and homeowners seeking service in Benbrook now have access to the company's full range of installation and repair capabilities. The expansion also strengthens the availability of Burleson HVAC support,

extending coverage to commercial properties and residential clients in that community and the neighboring areas.

The move responds to rising demand for energy-efficient systems that reduce operational costs while improving indoor comfort. The company reports that commercial clients in particular have sought reliable installation partners capable of handling large-scale projects from initial consultation through post-installation maintenance.

"The decision to expand commercial Burleson HVAC service reflects the steady growth in demand across North Texas," said David, a representative of 822 Heat and Air. "Commercial property owners need systems that perform reliably in the Texas climate, and the expanded coverage allows the team to serve more businesses with the same attention to precision and care."

The company's certified technicians manage each project with an emphasis on energy-saving solutions. According to the company, properly designed and installed systems help commercial clients lower operating expenses and contribute to a more sustainable environment. Comprehensive support is provided at every stage, from the first consultation to routine maintenance after installation.

"Every installation is approached as a long-term investment for the client," David added. "The goal is to deliver systems that operate efficiently for years, whether the project involves a rooftop unit for a commercial building or a complete system for a residence."

In addition to commercial work, 822 Heat and Air continues to offer residential HVAC installation, ductwork services, and seasonal air conditioning tune-ups. The company serves communities including Crowley, Burleson, Benbrook, Granbury, Joshua, Godley, Cleburne, Alvarado, Fort Worth, Arlington, and Dallas.

822 Heat and Air is a professional heating, ventilation, and air conditioning company providing both commercial and residential services throughout the Greater DFW Metroplex and its suburbs. The company specializes in complete HVAC installation, repair, and maintenance, with a team of certified technicians who prioritize energy efficiency, reliability, and client comfort. 822 Heat and Air holds Texas license number TACLA65080C and offers financing options subject to credit approval and offer eligibility.
