822 Heat and Air Expands Commercial HVAC Installation and Repair Services Across Greater DFW

September 01, 2026

Benbrook, TX - September 01, 2026 -
822 Heat and Air has expanded its commercial HVAC installation and AC repair services throughout the Greater DFW Metroplex, extending support to businesses in Mansfield, Burleson, and surrounding communities. The expansion reflects growing demand among commercial property owners for reliable heating, cooling, and ventilation systems that lower operational costs and improve indoor comfort.

The expanded offerings include the installation of central air systems, rooftop units, split systems, ventilation solutions, ductwork design, heat pump systems, chiller systems, and building automation systems. Alongside new installations, the company provides commercial HVAC replacement, service, and repair for facilities of varying sizes and complexity. The broadened service footprint positions the company to serve additional commercial clients seeking energy-efficient solutions.

As a commercial HVAC company built around a customer-centric approach, 822 Heat and Air relies on a team of certified technicians who handle each project from initial consultation through post-installation

maintenance. The company emphasizes energy-saving systems designed to reduce utility expenses while contributing to a smaller environmental footprint for the businesses it serves.

Demand for commercial hvac mansfield tx projects has increased as commercial building owners look to modernize aging systems and meet rising expectations for climate control in workspaces. The company reports that many of its recent projects involve replacing outdated units with newer, higher-efficiency equipment capable of handling the seasonal temperature swings common across North Texas.

"Commercial properties across this region operate on tight schedules, and system reliability directly affects productivity," said David, a representative of 822 Heat and Air. "Expanding these services allows the team to reach more businesses that need dependable installation and prompt repair support, particularly during the demanding summer months."

The company's work extends beyond installation into ongoing maintenance and emergency repair, giving facility managers a single point of contact for their heating and cooling needs. Regular maintenance helps prevent unexpected breakdowns, improves energy efficiency, and extends the useful life of commercial equipment, factors that carry significant weight for property owners managing operating budgets.

Interest in burleson commercial hvac services has grown alongside commercial development in the area, and the expansion is intended to meet that need with faster response times and a wider range of system options. The company's technicians assess each facility individually before recommending equipment, ductwork configurations, or automation systems suited to the building's layout and usage patterns.

"Every commercial space presents different challenges, from square footage to airflow requirements," David added. "The approach centers on evaluating those specifics first, then delivering a system that performs efficiently over the long term rather than applying a one-size-fits-all solution."

822 Heat and Air is a professional HVAC company that provides both commercial and residential heating, ventilation, and air conditioning services. The company offers commercial HVAC, residential HVAC, ductwork, and AC tune-up services, serving Crowley, Burleson, Benbrook, Granbury, Joshua, Godley, Cleburne, Alvarado, Fort Worth, Arlington, Dallas, and communities throughout the Greater DFW Metroplex and suburbs. Operating under license number TACLA65080C, the company focuses on energy-efficient solutions and comprehensive support from consultation through maintenance.
